RE: APS's 2014 and 2015 Renewable Energy Standard Implementation Plans:
Voluntary Solar Contribution Program Report.
Docket Nos. E-01345A-13-0140 and E-01345A-14-0250

Arizona Public Service Company (APS) was ordered to create a voluntary solar contribution program (VSCP) in Decision No. 74237. The VSCP was approved by the Arizona Corporation Commission in Decision No. 74823 and became effective on January 1, 2015. Decision No. 74823 requires APS to file a progress report on the VSCP by October 1, 2015. Attached, please find APS's October 2015 Report on its VSCP.

If you have any questions regarding the information contained herein, please contact me at 602-250-3341.

Sincerely,

A handwritten signature in black ink, appearing to read "Kerri A. Carnes", with a long, sweeping horizontal line extending to the right.

Voluntary Solar Contribution Program

October 1, 2015

Introduction

Arizona Public Service Company's (APS) 2014 Renewable Energy Implementation Plan Order (Decision No. 74237) required the Company to develop a plan for a solar voluntary contribution program. On November 13, 2014 (Decision No. 74823) the Arizona Corporation Commission (Commission) approved the Voluntary Solar Contribution Program (VSCP or Solar Assist) to begin on January 1, 2015. APS is required to provide a progress report on October 1, with another report provided in April as part of the annual REST Compliance Report. The report details the program's promotion, the number of APS customers and others making contributions during the reporting period, the number of system installations (total and during the reporting period), funds collected during the reporting period, the total funds held, any interest or earnings accrued, and any expenses. This report encompasses the first reporting period of January 1, 2015 – June 30, 2015.

Solar Assist is the outward facing name for the VSCP. The program provides individuals and entities an opportunity to support Arizona solar resources for limited-income families by making a donation to the Arizona Community Foundation (ACF), a tax-exempt, third-party independent organization. The donated funds will be used to install solar photovoltaic systems on newly built residential single-family homes constructed by the Central Arizona chapter of Habitat for Humanity. The funds are separate from those funds collected through the Commission's mandatory Renewable Energy Standard adjuster mechanism applied to APS customer bills. An important aspect of the Solar Assist program is that any member of the general public may make a voluntary contribution; participation is not limited to APS customers.

Contributions

	No. Received	Reporting Period 1/1/15- 6/30/15	Total
Customer Contributions	2	\$550	\$550
Non-Customer Contributions	1	\$25	\$25
Interest Accrued/Investment Return		\$(0.69)	\$(0.69)
Expenses*		\$(2.40)	\$(2.40)
ENDING FUND BALANCE AS OF JUNE 30, 2015		\$571.91	\$571.91

* Any administrative fees for the fund will be assumed by APS

For additional information on the investment activities of the Arizona Community Foundation in relation to the VSCP, please see the Fund Activity Statement in Attachment A.

Program Promotion

APS initiated a number of promotional and marketing efforts to promote the Solar Assist program during the first reporting period of January 1, 2015 – June 30, 2015.

Kick-off Event

On May 31, 2015 APS, the Arizona Corporation Commission, the City of Peoria, and Habitat for Humanity kicked off the Solar Assist program at the future site of the Gil family home, the dedicated first recipient of a solar system through Solar Assist. Attendees at this kick-off event spent the morning working on construction of the home with members of the Gil family. The event concluded with presentations by Arizona Corporation Commissioner Bob Burns, the Mayor of the City of Peoria, (Cathy Carlat), the President and CEO of Habitat for Humanity Central Arizona, (Roger Schwierjohn) and the President and CEO of APS (Don Brandt). Funds collected will eventually pay for the rooftop solar system of the Gil family, which will be 3kW and cost approximately \$12,000. Don Brandt finished by announcing that APS will match the first \$6,000 donated to Solar Assist and the Company will be installing the solar system on the residence when construction is complete in the fall of 2015 even if enough money had not been raised by that time.

Habitat for Humanity/APS Press Release

On June 1, 2015 APS and Habitat for Humanity released a joint press release outlining the kick-off event that highlighted the Solar Assist program. The three page press release discussed all the organizations and entities involved (Arizona Corporation Commission, Habitat for Humanity, City of Peoria and APS), what the Solar Assist program is, the family that will be receiving the solar system, and how anyone can make contributions. (see Attachment B)

Solar Assist Web-page

APS has created a webpage dedicated to the Solar Assist program that provides details on the program, how to donate to the program and a link that will take you directly to the Arizona Community Foundation website.

The webpage can found through a link on the Company's homepage or at:

<https://www.aps.com/en/communityandenvironment/charitablegiving/solar-assist/Pages/home.aspx?src=solarassist>

Customer Newsletter

The APS March 2015 customer newsletter included an article from Stacy Derstine, APS's VP of Customer Service and Chief Customer Officer. The article discussed the new Solar

Assist program and provided a link to the Solar Assist website where customers could learn more about the program and/or make a donation. (see Attachment C)

APS.com News Stories

Throughout both March and June, aps.com ran a news story introducing and explaining the new Solar Assist Program that APS was offering. The news story provided a link to the Solar Assist website where customers could learn more about, and/or donate to, the program. (see Attachment D)

Future Reporting Periods

APS has undertaken a number of additional marketing efforts since the end of the reporting period, and intends to promote the Solar Assist program even more before the end of 2015.

These promotional efforts include:

- Bill Messaging in September 2015 (see Attachment E);
- Social media posts in October 2015; and
- Promotional material distributed at the Maricopa County Home & Garden Show in October 2015 (see Attachment F).

Systems Installed

To date, no solar systems have been installed. APS intends to install an approximate 3kW system on the Gil family residence being constructed through Habitat for Humanity Central Arizona once construction is complete later this year.

ATTACHMENT A

FUND ACTIVITY STATEMENT

April 1, 2015 to June 30, 2015

APS
400 N. 5th St.
Phoenix, AZ 85004

Dear Friends,

For the second time, ACF participated in the Center for Effective Philanthropy's Donor Perception Report in order to gauge your satisfaction with our services and performance. Thanks to your responses, we're able to compare this year's findings to our 2012 results to measure how we have improved in key areas. And because this survey is part of a national study, we can also compare your feedback to the feedback of other community foundation donors across the country.

From the survey, it is clear that overall, you are satisfied with the Arizona Community Foundation. Responses trended higher than in 2012 on nearly every measure of satisfaction. Respondents commended our staff for their responsiveness, expertise and professionalism. You also reported relying on our staff, our annual report and our website to advance your charitable goals and learn about the Foundation's work.

One donor submitted the following: "The personal contact is hugely important to me. Their advice and guidance [from ACF staff] helped me feel successful that my personal goals were heard, valued, and realized. I have always felt valued."

We appreciate this recognition and will work even harder to provide you with excellent customer service.

There are also areas in which we can improve, something we are completely committed to. As another donor reported, "Being in rural Arizona, we need more education to what the Foundation is and how it can help our community." And still another respondent suggested a new donor orientation or a question and answer session.

The findings also showed us that you want to know more about our leadership across Arizona, our organizational goals and the impact that our work is having on the people and communities we serve.

Your feedback is immensely helpful to us in guiding our decisions, communications and programming and we are incorporating your recommendations into our three-year strategic and operating plans. We thank you for your time and your candor, and look forward to introducing new communication channels to help you stay connected to what we are achieving together. Because we are committed to continuous improvement, we are giving full consideration to each comment shared as well as the areas where we ranked lower than we expected.

In the interest of transparency, the full survey results and analysis are now available on our website for your review and comments. We'd love to hear from you once you've reviewed the full report. Please be in touch with us to share any thoughts or ideas.

Our fiscal year ended on March 31, 2015, and it was another great year for ACF—which means great things for Arizona. Contributions to your funds topped \$72 million, continuing the positive trend we've seen in charitable giving across the nonprofit sector since the recession. As more Arizonans establish new funds, or add to their existing funds, the larger the amount we have available for grantmaking to community-based organizations and students seeking higher education. Total grants and scholarships awarded this year exceeded \$45 million, a five-year high. These and many more highlights of the year will be available in your 2015 Arizona Community Foundation Annual Report, which will be mailed in late September.

Thank you, as always, for your continued trust and partnership.

Sincerely,

Steven G. Seleznow
President & CEO

TARGET ASSET ALLOCATION

These charts reflect the target asset allocation for each of ACF's investment pools. Asset allocations are recommended by the Investment Committee, with guidance provided by ACF's investment consulting firm, and approved by the Board of Directors.

MARKET COMMENTARY

provided by ACF's investment consulting firm, Pavilion Advisory Group

Global equity market returns were muted during the second quarter of 2015. The S&P 500 returned +0.3% and the Russell 2000 Index gained +0.4% for the quarter as expectations of rising interest rates and worries over a potential Greek exit from the Eurozone offset the positive impact from better-than-expected corporate earnings and improving U.S. economic data released later in the quarter. International equity markets produced robust returns in April driven by signs of improving economic growth in the Eurozone along with stimulus measures from the central banks in the Eurozone and China. However, sentiment for international equities turned negative in May and June amid the uncertainties surrounding Greece, large declines in the Chinese stock market, and strengthening in the U.S. dollar. Despite the issues in Greece, economic data continued to point to improving growth in the Eurozone throughout the quarter. The MSCI EAFE Index returned +0.6% during the quarter while the MSCI Emerging Markets Index returned +0.7%. The Barclays U.S. Aggregate Index returned -1.7% for the quarter as Treasury yields declined during each month in the quarter. In June, bond market volatility rose and credit spreads widened to their highest level since mid-2013. Dovish comments from Fed Chairwoman Yellen helped ease investor worries but market sentiment continues to expect an initial rate hike in September.

Click [here](#) to see an APS video of Saturday's Habitat for Humanity Solar Assist Kick-Off.

APS MATCHES FUNDS FOR FIRST HABITAT FOR HUMANITY SOLAR RECIPIENTS

Program expands solar to more customers across Valley

PHOENIX – Officials from the Arizona Corporation Commission, the city of Peoria, Habitat for Humanity Central Arizona and APS kicked off the APS Solar Assist program Saturday at the future site of the Gil family home in Peoria. Habitat for Humanity Central Arizona's family partner, the Gil family – Luz and her three children – will be the first recipients of a rooftop solar system under the ACC's Voluntary Solar Contribution Program, which the Commission approved in November.

The program enables APS to expand solar to low-income customers by facilitating access for the general public to make voluntary, tax-deductible contributions to the program. Donated funds will be used to pay for rooftop solar systems on Habitat for Humanity homes throughout central Arizona.

"The Voluntary Solar Program provides a mechanism by which anyone can make direct voluntary, tax -deductible contributions to low-income recipients chosen by Habitat for Humanity who wouldn't otherwise be able to afford solar," said Commissioner Bob Burns. "This is a great opportunity to expand the development of solar in the state while also providing solar to low-income consumers who wouldn't otherwise be able to afford it, and who will benefit from reduced energy costs. I am excited to kick off the program by providing my own donation to the Arizona Community Foundation."

With an employee-led "sea of turquoise" community service activity underway at the site, APS capped off the volunteer event by announcing it would match the first \$6,000 donated to the program. Funds collected will eventually pay for a rooftop solar system for the single-family home being constructed by Habitat for Humanity with the Gil family. A typical 3-kilowatt solar system costs about \$12,000.

"We are serious about modernizing our grid to support clean, renewable energy," said APS Chairman, President and CEO Don Brandt. "That's why we are proud to support this program which offers the Gil family – and others like them – a chance to 'go solar.'"

Brandt also said APS would donate a solar system to the Gil family if enough money hadn't been raised by the time construction on the home is expected to be completed this fall.

ATTACHMENT B

APS HELPS BRING SOLAR TO HABITAT HOME

June 1, 2015

Page 2 of 3

Community at Work

The Habitat-organized community effort will eventually move the family from living in a cramped single-wide manufactured home to the single-family, new construction home that includes solar. The City of Peoria donated the land while Habitat utilized HOME Investment Partnership funds from the city as well as Home Sponsorship funds from Total Transit and Jones Lang LaSalle to help build the Gil family home.

The HOME Investment Partnerships Program provides formula grants to States and localities that communities use to fund a wide range of activities including building, buying, and/or rehabilitating affordable housing for rent or homeownership or providing direct rental assistance to low-income people. The program is federally funded by the U.S. Department of Housing and Urban Development.

The Gil family met Habitat's selective requirements regarding home ownership and "sweat equity." A native of Mexico, Luz Gil has lived in Arizona for 20 years, and works at a community care agency helping children with disabilities.

"We value this community and the partnership with the City of Peoria and APS," said Roger Schwierjohn, President and CEO of Habitat for Humanity Central Arizona. "And, we certainly value minimizing energy costs for our family partners."

Any individual or entity wishing to make a contribution to the APS Solar Assist Program may do so through the Arizona Community Foundation website or by sending a check earmarked for the Solar Assist Program to:

APS Solar Assist
care of: Arizona Community Foundation
2201 E Camelback Rd #405B
Phoenix, Arizona 850 16

Contributions will be held in a tax-exempt, irrevocable fund until funds are available to purchase and install a system with a five-year maintenance agreement. Anyone can make donations to the fund in any amount. Donations to the Arizona Community Foundation, a tax-exempt 501(c)(3) public charity, are generally tax deductible as allowed by law.

Serving Central Arizona since 1985, Habitat for Humanity Central Arizona (HFHCAZ), an affiliate of Habitat for Humanity International, is an independent, locally run, nonprofit 501(c)(3) organization. Habitat helps families of low and moderate incomes become homeowners by building and partnering in the creation of affordable housing. HFHCAZ also builds community partnerships that promote spiritual values and individual responsibility. The Central Arizona affiliate is one of the largest and most active of the Habitat affiliates and is responsible for building and renovating more than 1000 homes. Currently, the affiliate serves Maricopa County and Pinal County.

ATTACHMENT B

APS HELPS BRING SOLAR TO HABITAT HOME

June 1, 2015

Page 3 of 3

APS, Arizona's largest and longest-serving electricity utility, serves nearly 1.2 million customers in 11 of the state's 15 counties. With headquarters in Phoenix, APS is the largest principal subsidiary of Pinnacle West Capital Corp. (NYSE: PNW).

Arizona Corporation Commission Commissioner Bob Burns (Center) was on hand in Peoria Saturday to dedicate the Gil family home as part of the APS Solar Assist Program in partnership with Habitat for Humanity Central Arizona. Solar Assist enables APS to expand solar to low-income customers by facilitating access for the general public to make voluntary, tax-deductible contributions to the program. The program is part of the ACC's Voluntary Solar Contribution Program, which Burns initiated and the Commission approved in November.

aps®

STAY COOL AND SAVE SOME CASH

With warmer weather right around the corner, take this opportunity to make sure your air conditioning unit is well prepared to keep you cool all summer long. About 55 percent of all units do not run at their peak efficiency, which leads to wasted energy and money. Properly maintaining your unit not only helps its performance, but it can also prevent breakdowns and costly repairs.

The ideal time to get an AC tune-up is when temperatures are at 75 degrees or above. Participate in our Advanced AC Tune-Up program and ensure that your unit is in top shape. And what's best, you could be eligible for a \$100 APS rebate.

For more information, please visit aps.com/tuneup or call the APS Energy Answer Line at (602) 371-3636 (metro Phoenix) or (888) 890-9730 (other areas).

The screenshot shows the APS Energy Analyzer website. At the top is the APS logo and navigation links: account services, save money & energy, renewable energy, and residential support. Below this is a breadcrumb trail: residential > save money & energy > energy analyzer. The main heading is "Discover Your Energy Savings Potential" with the subtext "Start now and find great ways to save." Below this is a "Home type" section with a radio button selected for "Single-family home".

SAVING ENERGY AND MONEY IS EASY

Looking for easy ways to save energy and money this year? Take our quick online Energy Analyzer survey to learn how efficient your home is. You'll also receive energy-saving tips and recommendations that are tailored to your home. It's as easy as 1, 2, 3:

- 1 Visit aps.com/ea and take our five-minute Energy Analyzer survey
- 2 Activate your account online and log in to see your energy-saving recommendations
- 3 Receive customized, low-cost tips to start saving energy

Some of the simple things you can do include setting your air conditioning thermostat a few degrees higher to cut your cooling costs by 3 percent or replacing your air filters at least once a month to increase the lifetime of your cooling and heating system. By spending just a few minutes online, you'll see how easy it is to save by making small adjustments.

Take the first step towards saving today! Please visit aps.com/ea to get started.

PUTTING FIRST RESPONDERS FIRST

Every day, first responders put others' lives before their own. In gratitude for their efforts, we are proud to recognize these everyday heroes for the sacrifices they make.

Through our partnership with Firehouse Subs Public Safety Foundation, first responders are given access to equipment they need to safely perform their jobs. We have also provided a grant to Professional Fire Fighters of Arizona allowing 100 Phoenix firefighters to receive an innovative screening test. Developed by Phoenix-based VisionGate, the test can detect early-stage lung cancer with simply a cough.

In addition, we are proud to sponsor the inaugural D-backs Luis Gonzalez Hitting Challenge benefitting the 100 Club of Arizona, which supports the families of seriously injured and fallen police officers and firefighters.

"We are committed to Arizona's first responders," said APS CEO Don Brandt. "We will continue to look for ways to support these brave men and women and their families."

AT YOUR SERVICE

I am excited to introduce a new program that will help fund rooftop solar systems for single family low-income housing. APS Solar Assist is a voluntary contribution program that will be administered through our partnership with the Arizona Community Foundation.

For years, we have partnered with Habitat for Humanity to build and renovate homes, strengthen communities and inspire hope. These rooftop solar systems will be funded through donations to the program and will be placed on homes that are newly constructed throughout our service territory by the central Arizona chapter of Habitat for Humanity.

Any voluntary tax-deductible donations to the fund are welcome, no matter how large or small, from customers and non-customers alike.

Through this program, we can all support the growth of solar energy while helping make a difference for Arizona families. For more information about the program, or to find out more about how to donate, please visit aps.com/solarassist.

Sincerely,

Stacy

COMMUNITY CORNER

In celebration of spring, we are welcoming Arizona's sunny days with our annual APS Solar Month, a partnership with the Arizona Science Center. Last March, more than 42,000 Science Center visitors participated in solar activities such as creating solar ovens, planting sunflowers, making UV bracelets and using solar telescopes. These activities bring learning to life for Arizona's children, allowing them to learn beyond the classroom.

We're proud to partner with the Arizona Science Center not only during Solar Month, but throughout the year. The Science Center fills a much-needed niche in our community and we believe that educating students and offering diverse learning opportunities contributes to the progress of our state.

Our contribution to the Science Center's Future of Education campaign created Solarville, an interactive gallery dedicated to understanding the power of the sun and other renewable energy sources. We have spent 60 years advancing solar technology through innovative programs and research projects, and Solarville is one way that we are helping our community better understand the benefits of solar energy.

WHO KNEW?

Older refrigerators and freezers consume three to four times more energy than newer models. If you're shopping for a new fridge, we'll haul away your old unit for free and give you a \$30 rebate. Even better, you'll save up to \$100 a year in energy costs. Schedule your free pickup today at aps.com/turnitin or call (877) 514-6654.

SAFETY FIRST

As springtime approaches and you start your next gardening project, please keep some of these tips in mind:

- ✓ Contact us if there are concerns about tree limbs growing into or around overhead power lines on your property
- ✓ Call 811 at least two full working days before you begin any excavation projects
- ✓ Do not use electric-powered mowers on wet grass or around water

September bill message:

Help provide rooftop solar systems for families in need with APS Solar Assist program

APS Solar Assist is a program that is helping to fund rooftop solar systems for single-family, low-income housing. It is a voluntary contribution program that is administered through our partnership with the Arizona Community Foundation. The rooftop solar systems will be funded through donations to the program and will be placed on homes that are newly constructed throughout our service territory by the central Arizona chapter of Habitat for Humanity. Any donations made to the fund are tax-deductible and will help make a difference for Arizona families. For more information or to donate, please visit aps.com/solarassist.

APS Solar Assist

Helping Arizona families while supporting the growth of solar

APS Solar Assist is a new program that will help fund rooftop solar systems for single family low-income housing. These rooftop solar systems will be funded through donations to the program and will be placed on homes that are newly constructed throughout our service territory by the central Arizona chapter of Habitat for Humanity.

For years, we have partnered with Habitat for Humanity to build and renovate homes, strengthen communities and inspire hope. And with the new APS Solar Assist program we are can all make a difference for those in need while supporting the growth of solar in Arizona.

APS Solar Assist is a voluntary contribution program that will be administered through our partnership with the Arizona Community Foundation. Any voluntary tax-deductible donations to the fund are welcome, no matter how large or small, from customers and non-customers alike.

For more information about the program, or to find out how to donate, please visit aps.com/solarassist.
